

BMCS 3033

Social and Professional Issues

Written Assignment

202601

1. Aims

This assignment is a partial fulfilment of requirements leading to Bachelor of Information Systems, Bachelor of Information Technology, Bachelor of Computer Science, Bachelor of Science and Bachelor of Software Engineering for students who are taking the course of BMCS 3033 Social and Professional Issues.

This assignment will focus primarily on contemporary social, legal, market and ethical issues surrounding computing, its application/architecture, and its effect on society. It requires the students to take an issue or problem of ethical, social, market and/or legal relevance to the computing profession, analyse the relevant information/facts/findings, propose relevant solution(s), formulate a conclusion, defend this finding and conclusion clearly in a written form and oral presentation form.

Upon completion of this assignment, students would be able to appreciate and practically apply critical thinking and personal skill and techniques to write an in-depth finding and justification on contemporary issues in computing.

2. Learning Outcomes

Upon the completion of this assignment, the students will be able to: -

- Demonstrate that they understand and be aware of the impact of technology on 21st century living where computing technology is constantly evolving and changing to become a vital component of our lives.
- Examine the social, legal and ethical challenges they will face in the technology century, and be conscious of online crime, piracy and personal data usage topics.
- Formulate a solution/justification upon the ethical, social and professional issues faced and present such findings in a manner that is persuasive to your audiences.

3. Group Formation

Students will need to form a group of **4 to 5** members, depending on the class size, to work on this assignment.

Every member in the team is expected to contribute and participate actively in the entire process of completing this assignment. Sharing of ideas, extensive group discussion, and brainstorming among group members are required to complete this given assignment. Every assignment team should select a team leader to help to plan and coordinate the discussion among all group members and organise the work/finding by all group members.

4. Assignment Tasks

For this assignment, students are required to choose and examine **ONE** contemporary social/ethical topic from the following topic listing: -

1. Cross-Border Cybercrime and the Challenge of Enforcing Real-World Punishments
2. Ethical Responsibility of IT Professionals in Preventing Data Breaches and System Misuse
3. Cyber Warfare and the Use of AI in Modern Military Conflicts
4. Government Regulation vs Tech Company Power in Internet Governance
5. Copyright Infringement and Intellectual Property Protection in the Age of Generative AI
6. Ransomware Attacks on Critical Infrastructure and National Security Implications
7. Ethical Concerns in the Use of Surveillance Technologies by Governments
8. Information Warfare, Social Media Manipulation, and Democratic Stability
9. Balancing Innovation and Intellectual Property Rights in Open-Source Software Development
10. Accountability and Legal Consequences for Online Hate Speech and Digital Harassment

Explore the topic selected in depth. This will take some searching on your part.

Students are required to do research through Internet sites, acquire further information from reference books/journals, and obtain additional ideas from other resources.
Prepare a report according to the attached report format to assess and complete the following assignment tasks: -

Part 1: Group Work:

- a) Background [4 marks] • Write an overview to describe the background of the contemporary topic selected. • Identify all the stakeholders involved.
- b) Explore and analyze your chosen topic from social, legal, architecture and market perspectives. [40 marks] • Analyze the selected topic with examples, case studies, facts, etc to provide your finding here. • Justify your opinions/thoughts on the impacts of selected topic from social, legal, architecture and market perspectives.
- c) Propose the solution(s) for your chosen topic. [20 marks] • Justify your proposed solution(s) for your chosen topic from social, legal, architecture and market perspectives.

Part 2: Individual Work:

- d) Each student is required to write a reflective writing on an ethical issue/case rose within your chosen topic in Part 1. Your title should not be like your group members. Reflective writing should clearly state the ethical issue/case that you intend to focus on, who are the stakeholders involved, what power they have or don't have. You are expected to analyze the issues critically by using one or more ethical philosophies to support your points and perform ethical evaluation on the actions of stakeholders. Reflective writing should significantly address the issue based on personal response to the issue, situations, events, or new information.
[30 marks] **What is reflective writing?**

Before you can begin to assess the issue, you need to pause and identify and examine your own thoughts about the issue. You are required to revisit your prior experience and knowledge of the issue you are exploring. You need to consider how, why you think the way you do, who are the stakeholders involved and in what ethical bases they have responded. Based on this you need to examine your beliefs, values, attitudes, and assumptions form the foundation of your understanding about the issue. Reflective thinking demands that you recognize that you bring valuable knowledge to every experience. It helps you to recognize and clarify the important connections between what you already know and what you are learning. It is a way of helping you to become an active, aware, and critical learner.

REMARK: Please refer to Assignment Final Report Assessment Criteria (Appendix – FORM 2) as the marking rubric of this assignment.

5. Distribution of Assignment & Submission Date

Assignment question distribution date : Week 1

Assignment report submission date : Monday, Week 11 (6th April 2026)

6. Assignment Report Format

The final assignment finding report should consist of the following components:

- (a) Cover sheet (Appendix - FORM 1)
- (b) Assignment Final Report Assessment Criteria (Appendix – FORM 2)
- (c) Free Rider Agreement (Appendix – FORM 3)
- (d) Clear listing on individual task allocation for this assignment. (Appendix – FORM 4)
- (e) Acknowledgement
 - Students should express their appreciation towards any 3rd party for assistance and provision of information used in the report.
- (f) Table of contents
 - It should indicate the various headings or sub-headings covered in the assignment and page numbers.
- (g) Body of answer
 - Students should include of research, findings, recommendations, and evaluation as according to assignment task (a) to (d).
- (h) Reference section
 - Students should only include a list of references of which they have used. (*Students are required to use APA Referencing System format*)
- (i) Appendices section
 - Include Google Classroom Originality Report matching score page here.
 - Students **should** try to include all relevant materials, figures, or diagrams in the main body of answers rather than in the Appendix to enhance the understanding of the assignment. This section is reserved for items which may not be directly relevant or essential to enhance a reader's understanding of the assignment, or which may interrupt the reading of the assignment (e.g., too voluminous).

The report must be type-written using **MS-Word** and written in the format of the following requirements: -

Font Size	A body text of font size 12 is required while for headings and subheadings a larger font size must be used.
Font Style	Use <i>Times New Roman</i> for body text. Main headings and sub-headings should be clearly stated using suitable font styles (e.g., Arial).
Line Spacing	Typed material should be <i>single-line spaced</i> .
Alignment	Use <i>Justify</i> for alignment.
Headers and Footers	Appropriate footers and headers should be used to enhance clarity and presentation.
Page Numbering	Ensure that all pages (except cover page) are numbered.
Paper Size	Use A4 paper (29.7cm x 21cm).
Submission	Online Submission (in PDF format) in Google Classroom composed of: 1. Final Assignment Finding Report + 2. Full Originality Report Generated from Google Classroom ***Please liaise with the respective tutor(s) to submit your assignment submission through separate/individual google classroom created by respective tutor accordingly.

Table 1: Written Report Format

7. Assessment

This assignment will contribute a total of 50 percent to the coursework marks of the course. A final assignment finding report shall be produced as an outcome of the research, findings, and evaluation.

The students will be assessed on a written report in **-NOT** more than 13 pages (maximum word count 5000 words) for group work-assignment task (a) to (c) **-NOT** more than 3 pages (maximum word count 1000 words) for individual work-assignment task (d) personal reflective writing per individual

exclude the number of pages for cover sheet, assessment criteria, plagiarism statement, list of tasks allocation, acknowledgement, table of contents, references, and appendices.

where this will be assessed based on the following criteria: -

- Clarity of explanation
- Reasonable command of English
- Reasonable coverage of discussion, information and evaluation.

8. Breakdown of Assignment Marks

Component	Mark breakdown (%)	Type of assessment
Assignment Part 1 (Refer to APPENDIX - Form 2)	70	Group
Assignment Part 2 (Refer to APPENDIX - Form 2)	30	Individual
Total	100	

9. Late Submission

All assignments should be submitted by the stipulated due date, **week 11, Monday, 6th April 2026, before/by 11.59pm**) unless it is revised and approved by the respective lecturer / tutor. Marks will be deducted for late submissions of the assignment finding report at the following ratio: -

- Late 1 to 3 days after deadline of submission: minus 10 marks;
- Late 4 to 7 days after deadline of submission: minus 20 marks;
- Late more than 7 days after deadline of submission: 0 marks awarded

unless reasons or application for extension and approval is given before the due date of the assignment submission. Therefore, the responsibility is upon the students to ensure that an assignment is substantially prepared prior to the submission date. Late submissions for more than **SEVEN (7)** days (from due date) will not be accepted.

At a general rule, no extension of time will be granted. The assignment question and its due date are normally disclosed in advance to students in order that they will be able to manage their time according to different subject study progress and complete this assignment on time.

10. Penalty

Students are required to redo the entire assignment (depends on the seriousness of inaccuracy of the answer) if the contents of any part of the assignment does not comply with the requirements of the assignment as requested by the subject lecturer/tutor.

11. Feedback

A written feedback on the assignment will be returned to the students latest by week 14, by the tutor in charge.

12. Plagiarism & Collusion

The Faculty of Computing and Information Technology views cases of plagiarism or collusion by students seriously. Any students who intentionally plagiarize or collude in any part of their assignments/projects or written work threatens the values of academic work and undermines the credibility and integrity of the TAR UMT's awards. Plagiarism or collusion discovered at any stage of the student's course of study will be dealt with appropriately by the faculty. Such offender shall appear before a panel of enquiry at the faculty and appropriate punishment will be meted out. Punishment may include failing the student for the assignment or project, re-submission of another piece of work or downgrading of the work the maximum of a pass grade even if actual grade achieved was higher.

What constitutes "Plagiarism" and "Collusion"?

Plagiarism according to the Oxford Advanced Learner's Dictionary of Current English means "take and use somebody else's ideas, words, etc as if they were one's own."

Plagiarism can take the form of reproduction without acknowledgement from published or unpublished works of others including materials download from computer files and the Internet.

Student's work submitted for assessment is accepted on understanding that it is the students' own effort without falsification of any kind. Acknowledgement to the source must be made if students had relied on any sources for information with appropriate reference being made in their work. In particular, you need to cite sources discovered on the Internet or any other publications. Given the explosion of electronic publications in recent years, students need to be careful that their assignments do not become an exercise in cutting and pasting existing abstracts or portions of World Wide Web pages. Rarely will such an approach produce acceptable results.

Collusion can be deemed to be a form of plagiarism involving the unauthorized co-operation between two or more people with deceptive intention.

Collusion can take the form of two or more students producing a piece of work together but with one intentionally passing it off as his work with the knowledge of the others. Student may have submitted the work of another as his own with consent from that other student. In such cases, both parties are guilty of collusion.

Obligations of students

Students are required to sign a declaration form that the work submitted such as course work assignment, essays and projects, etc is their own original work/effort and that they have not in any way knowingly or allowing another student to copy it. It will be assumed that all submitted work is that of the students' own work.

Students are expected to familiarize themselves with or make use of method(s) of citing other people's work in accordance with acceptable referencing.

13. Originality Check

Students are required turn in their assignment report via google classroom. "Originality report" will be used by students to check their work for originality. Originality reports use Google Search to compare a student's work against billions of webpages and millions of books. Originality reports link to the detected webpages

and flag uncited text. The reports can help students identify unintentional plagiarism and uncited content before submitting assignments.

The matching contents of your report returned from Originality Report shall **NOT** more than **30%**. Before you submit your final assignment outcome for originality checking, please ensure that all work submitted must be original and NOT previously submitted for assessment in TAR UMT or elsewhere. Otherwise, penalty of mark action may be taken by subject tutor & students are required to review their report appropriately and re submit again.

14. Free Riding Policy

Students are required to read the free riding policy and comply with the TARUMT terms as stated. The policy is available on the Students Intranet.

15. Appendix

The following contains various forms used at various stages of the assignment. You may make copies where necessary.
